Dear Mr. Dawson,

I received your letter of 26th yesterday morning but have been so busy I could not seem to find time to write the letter to the San Diego people till this evening.

I suppose this must to a great extent be your work so I wish you would change the enclosed draught in any way you see fit. It seems an unusually good change to get up a fine stock of plants. They'll have 4 seasons to grow in I suppose. I hope they won't try to spread over too much ground and that they can afford a lot of interesting architectural garden decoration. I have a strong suspicion that they won't employ no though.

Yours sincerely
 John C. Olmsted
