A monumental door, highly executed, has also been discovered along with other architectural features which evidence the skilful work of former French artists.

PANAMA-CALIFORNIA EXPOSITION.

JOHAN C. OLMSTED of Olmsted Bros., architects, is in San Diego, California, under contract to the Panama-California Exposition to design the general character of the permanent buildings of the exposition and to advise regarding the landscape features of Balboa Park, which is to be the site of the exposition. The improvement of Balboa Park is preliminary to the Panama-California Exposition, to be held in San Diego in 1915, ostensibly in commemoration

of the completion of the Panama Canal, but practically as a means of exploiting the resources and opportunities of the Southwest, Mexico, Central and South America. The first buildings to be erected under the supervision of Mr. Olmsted will be an auditorium, an arts building, a modified Greek theater and a stadium. These with

their gardens, courts and grounds will occupy about 100 acres, and will form the nucleus for the further improvement of the park, which contains 1,400 acres of land admirably fitted for park purposes.

MOVING A CHURCH TOWER.

THE remarkable feat of moving a church tower in order to enlarge the original structure is being accomplished at Bocholt, Belgium. The work is under the supervision of two American engineers and the vast undertaking occupies only eight workmen. New foundations have been prepared for the tower some 30 feet away, to which machinery has been constructed for its transport. The tower dates from the fourteenth century and weighs

approximately 3,000 tons. The tower was raised by the insertion of a movable platform over steel cylinders which in turn move along a railway line. During the first six days the tower was moved 64 inches. The remarkable success attached to this endeavor has led the engineers to propose a similar method to the Italian Government for removing and placing new foundations under the Tower of Pisa.

BRONZE DOORS FOR CAPITOL.

THE doors for the Western Entrances of the National Building at Washington have now been completed and are to be

CONCOURSE OF PENNSYLVANIA RAILWAY STATION, NEW YORK CITY.
